— SUMMARY

Product-minded full-stack engineer with 7+ years of experience building SaaS platforms from zero-to-one and scaling mature products to millions of sessions per month. I partner deeply with product, design, and GTM teams to prioritize high-impact bets, instrument outcomes, and ship polished features that move conversion, retention, and revenue.

— EXPERIENCE

Senior Software Engineer   2023-01 – Present
TechCorp · SF, CA

— Led end-to-end delivery of a real-time planning workspace used by 85K+ weekly active users; rollout increased team adoption by 34% within two quarters.

— Designed an event-driven service architecture (Node.js, Kafka, Postgres) that reduced median API latency by 58% and cut incident volume by 41% year-over-year.

— Partnered with product analytics to define success metrics and experimentation strategy, resulting in a 17% lift in trial-to-paid conversion for self-serve accounts.

— Mentored five engineers through design reviews, pairing, and growth plans; two promoted to senior level within 12 months.

— Introduced quality gates and contract testing across CI pipelines, increasing change confidence and reducing regression escapes by 63%.

Software Engineer   2021-03 – 2022-12
StartupXYZ · Remote

— Built a customer-facing dashboard with React and TypeScript that processed $2M+ in monthly transactions and surfaced real-time account health for enterprise admins.

— Designed and implemented RESTful APIs using Node.js and PostgreSQL, handling 10K+ requests per minute while maintaining 99.95% uptime.

— Reduced page load time by 40% through code splitting, lazy loading, and image optimization, increasing weekly retention by 11%.

— Shipped role-based permissions and audit logs to satisfy SOC 2 customer requirements, unlocking expansion into mid-market accounts.

— EDUCATION

B.S. Computer Science   2019-05
UC Berkeley · Berkeley, CA · GPA: 3.8

— SKILLS

React, TypeScript, Next.js, Node.js, Python, PostgreSQL, MongoDB, AWS, Docker, Git, GraphQL, Tailwind CSS
